### **Maxey Flats Project to get Final Cap *Seeking Design Contractor***

**FRANKFORT, Ky.** (Oct. 11, 2012) – The Commonwealth of Kentucky is seeking an engineering firm to design the final cap for the Maxey Flats project, a low-level radioactive waste landfill in Fleming County, Ky.

The Energy and Environment Cabinet (EEC) initiated a Request for Proposals and it has been issued through the Kentucky Finance and Administration Cabinet.

“The design leading to construction of the final cap at the Maxey Flats Project is the next critical step in ensuring the long-term protectiveness of the facility,” said EEC Secretary Len Peters. Firms interested in the opportunity are encouraged to begin their review of the Request for Proposals and associated documents by going to the Kentucky Division of Waste Management’s website at <http://waste.ky.gov/SFB/Pages/MaxeyFlatsProject.aspx>. The Commonwealth’s procurement process will be used to select the winning firm, tentatively by January 2013.
